

## Keep your personal economy thriving with DI

[Music begins]

**Narrator:** Will your personal economy thrive, or collapse, in the face of adversity?

If you think about it, the global economy is not much different than your personal economy. Sure, your financial plans and aspirations might be a little different but the dynamics are largely the same.

Revenue versus expenses. Long-term savings strategies. And the overall health of your balance sheet.

In your personal economy, to maintain a balanced budget, your deposits should exceed your withdrawals.

But what happens if you're too sick or hurt to work? It does not take much for a disability to upend your personal economy.

A simple trip to the doctor's office, for example, can result in a disruption of cash flow. When your cash flow is disrupted, the withdrawals will soon outpace the deposits.

In fact, 66.5 percent of all bankruptcies in the U.S. are tied to medical bills.
